

Dear MHEC Member School:

We are pleased to introduce our company, **Eon Designs**. We are an innovative manufacturer of computer support furniture for technology-based learning environments.

Here are 5 Reasons to consider us for your next “smart classroom”:

1. We are a *Locally Based Company*.

- All products are designed, developed and manufactured in New England.
- We coordinate directly with our customers with a pro-active factory staff to provide unmatched customer service and follow-up.

2. We practice *Collaborative Product Development*.

- We place a high value on the input and feedback of our educational customers.
- Most of our product designs have been developed from that interaction.

3. We offer *More Technology Integration Solutions*.

- Our Computer Tables accommodate CRT and LCD monitors in multiple depths and widths, in desktop, partially and fully-recessed options, with security, networking and classroom multi-function considerations.
- Our multimedia Lecterns accommodate on-board computers, visiting laptops, and various AV components allowing for security, easy access, ventilation and mobility.

4. We create *Designs With Change in Mind*.

- Products are modular and designed for reconfiguration and growth.
- Our products can be upgraded as your technology changes.

5. We provide *Value Added Resources*.

- We develop *Customized Product Solutions* for colleges on a regular basis that are often *less expensive* than our feature-rich standard products.
- We can provide *Engineering and Design Expertise* including full scale mockups and classroom layouts.
- *Our employees are Computer Savvy*. They build and install our products. They know furniture and technology and how they need to interface in a learning environment.

I look forward to working with you all!

Sincerely,

Mark Stasko
Vice President/ Sales & Marketing
